

The INSTITUT DE RECHERCHE  
EN ASTROPHYSIQUE ET PLANÉTOLOGIE

wishes you a very happy new year

2021

\* Conceived within the framework of the NanoCosmos project funded by the ERC, the StarDust machine aims at reproducing the physico-chemical conditions that prevail near the stars. Within it, analogues of dust grains are produced and analyzed under ultra-vacuum (up to pressures of 10-11 mbar).
